

Case Study Reasoning

Some Simple Ideas

September 14, 2011

Intuitive Solution

- Intuition
- Data
- Argument
- Objections

Intuitive Solution

- Intuition
- Data
- Argument
- Objections

1. Determine the ethical question you are trying to answer

Intuitive Solution

- Intuition
- Data
- Argument
- Objections

1. Determine the ethical question you are trying to answer
2. Provide a tentative intuitive answer to the question.

Start to Form an Argument

- Intuition
- **Data**
- Argument
- Objections

Start to Form an Argument

- Intuition
- **Data**
- Argument
- Objections

1. List three or more reasons for this answer.

Start to Form an Argument

- Intuition
- Data
- Argument
- Objections

1. List three or more reasons for this answer.
2. List three facts that support this answer. For example, headless cats do not feel pain.

Start to Form an Argument

- Intuition
- Data
- Argument
- Objections

1. List three or more reasons for this answer.
2. List three facts that support this answer. For example, headless cats do not feel pain.
3. List one or more moral principles that support this answer. For example, we ought not to cause pain to others.

Create a Formal Argument

- Intuition
- Data
- **Argument**
- Objections

Create a Formal Argument

- Intuition
- Data
- **Argument**
- Objections

1. Using the factual premises and moral principles listed, construct valid moral arguments that lead logically to the formal answers you provide.

Create a Formal Argument

- Intuition
- Data
- **Argument**
- Objections

1. Using the factual premises and moral principles listed, construct valid moral arguments that lead logically to the formal answers you provide.
 - Write the moral principles.

Create a Formal Argument

- Intuition
- Data
- **Argument**
- Objections

1. Using the factual premises and moral principles listed, construct valid moral arguments that lead logically to the formal answers you provide.
 - Write the moral principles.
 - Write the factual premises.

Create a Formal Argument

- Intuition
- Data
- **Argument**
- Objections

1. Using the factual premises and moral principles listed, construct valid moral arguments that lead logically to the formal answers you provide.
 - Write the moral principles.
 - Write the factual premises.
 - Write the conclusions.

Create a Formal Argument

- Intuition
- Data
- **Argument**
- Objections

1. Using the factual premises and moral principles listed, construct valid moral arguments that lead logically to the formal answers you provide.
 - Write the moral principles.
 - Write the factual premises.
 - Write the conclusions.
2. Now provide a formal answer to the ethical question studied.

Objections

- Intuition
- Data
- Argument
- **Objections**

Objections

- Intuition
- Data
- Argument
- **Objections**

1. List potential objections to your arguments.

Objections

- Intuition
- Data
- Argument
- **Objections**

1. List potential objections to your arguments.
2. List responses to those objections.
