

Estimated Costs of Crop Production in Iowa – 2005

The estimated costs of corn, corn silage, soybeans, alfalfa, and pasture maintenance in this report are based on data from several sources. They include the annual Iowa Farm Business Association record summaries, production and costs data from the Departments of Economics, Agricultural and Biosystems Engineering, and Agronomy at Iowa State University and a survey of selected agricultural cooperatives and other input suppliers around the state.

These costs estimates are representative of average costs for farms in Iowa. Very large or small farms may have lower or higher fixed costs per acre.

Due to differences in soil potentials, quantity of inputs used and other factors, production costs will vary from farm to farm. Price shifts of inputs can change production costs in both the short and long run. The attached data reflect average cost of purchased inputs and a return to land and labor resources, but do not provide a margin for profit or a return to management. They reflect production costs only, and do not include costs of storage.

Labor has been treated as a fixed cost, since most labor on Iowa farms is supplied by the operator, family or permanent hired labor. However, when deciding among alternative crops, labor should be considered a variable cost. The wage rate used here is \$9.50 per hour. The hours assumed per crop are presented in the budgets. The hours per crop acre includes not only the field work but also time for maintenance, travel, and other activities related to crop production. The land charge is based on rent equivalent. Owned land may require a greater or lesser cash outlay.

In the short run, cash income must be sufficient to pay cash costs, including seed, fertilizer, chemicals, insurance, cash rent and hired labor, as well as machinery fuel and repairs and interest on operating

capital. In the long run, income should be sufficient to pay all costs of production for resources to be used in their most profitable alternative.

Corn yields reflect rotation effects. Fertilizer rates have been adjusted to reflect current data on removal rates. Crop insurance costs reflect the mix of multiple peril, revenue and hail insurance, as well as noninsured acres.

Machinery costs reflect both new and used equipment. The machine operations assumed are based on the 2000 Crop Production Practices Survey conducted by the Iowa Agricultural Statistics Service. Further information on this survey can be obtained by contacting the authors. The Estimated Machinery Costs table can be used to budget other tillage and harvesting systems.

Estimates represent typical costs and are only intended to be guidelines. Actual costs will vary considerably and can be entered in the column for “Your Estimates.” Electronic spreadsheets for developing crop production budgets are available on the Ag Decision Maker web site, www.extension.iastate.edu/agdm.

Budgets for alfalfa hay establishment with an oat companion crop and by direct seeding are included in this publication. Annual production costs for established alfalfa or alfalfa-grass hay as well as a budget for maintaining grass pastures are included as well. Additional pasture establishment budgets are published in Iowa State University Extension publication AG-96, *Estimated Costs of Pasture and Hay Production*.

Two low-till budgets, one for corn and one for soybeans, are included. The major differences between the low-till and conventional budgets are the preharvest machinery, labor, herbicide, and seeding costs. Beginning in 2005, primary soybean budgets are for herbicide tolerant varieties. Budgets for non-herbicide tolerant soybeans are also included. One budget is based on conventional tillage practices and one on drilled soybeans.

* Assumes 80 bushels oat yield, one ton straw yield and one ton per acre alfalfa yield from one cutting.

** Assumes two and a half tons per acre from two alfalfa cuttings with a herbicide-assisted seeding.

*** Omit oats from August seedings. Higher priced seed varieties or different seed mixtures could vary these costs by 1.2 to 2.0 times.

Annual production costs for established alfalfa or alfalfa-grass hay

	Hay Production Level				Your Estimate
	4 tons per acre *		6 tons per acre		
	Fixed	Variable	Fixed	Variable

Growing practices .5 hr. @ \$9.50		\$4.75		\$4.75	_____
Fence maintenance 1 hr. @ \$9.50		9.50		9.50	_____
Total Labor		\$14.25		\$14.25	\$ _____
Land Charge					
Cash rent equivalent		\$48.00		\$52.00	\$ _____
		\$67.43	\$42.22	\$70.51	\$ _____
				\$20.37	_____
Total Annual Cost per Acre		\$109.65		\$90.89	\$ _____

* These are average rates and may vary with soil test and the level of management on a particular field. Different herbicide alternatives could vary this cost.

** Improved grass pastures assume a dominance of cool season grasses such as smooth bromegrass, orchardgrass, tall fescue, or reed canarygrass.

*** Improved grass-legume pasture assumed one-third of the forage is made up of red clover, birdsfoot trefoil, or alfalfa.

Estimated Machinery Costs

The following cost estimates are for on-farm use, excluding labor. Depreciation is based on current replacement cost, interest is based on average market rates. Fixed costs will be greater for newer machinery. If annual machine use is greater than that assumed, fixed costs per acre will be lower, and vice versa. Hauling costs are based on a round trip of one mile. Remember these are estimates and they should not take the place of accurate record-keeping. Diesel fuel is estimated to cost **\$1.65** per gallon, delivered to the farm in bulk.

Operation	Hours of Use Assumed per Year	Fixed Cost per Acre (depreciation, interest, insurance, housing)	Variable Cost per Acre (fuel, oil, repairs)
Subsoiling (V-ripper)	120	\$5.34	\$3.92
Moldboard plow	120	7.54	5.75
Chisel plow	120	3.21	2.25
Chop stalks	120	3.80	2.86
Tandem disk	120	2.94	1.74
Offset disk	120	3.86	2.38
Peg tooth harrow	60	1.55	0.74
Sprayer/disk	120	3.45	2.10
Field cultivator	120	1.84	1.21
Disk/Field cultivator	120	1.84	1.19
Bulk fertilizer spreader	60	1.52	0.98
NH3 applicator	120	3.96	3.63
Chisel plow, NH3 applic.	120	5.78	5.26
Grain drill	100	3.43	2.56
Broadcast seeder	100	1.85	1.23
Planter	100	4.15	3.01
No-till planter	100	4.63	3.24
No-till drill	100	5.85	4.08
Rotary hoe	60	1.24	0.64
Cultivator	120	2.03	1.59
Sprayer	150	0.92	0.80
Combine corn	180	12.00	10.76
Combine beans	120	9.07	6.90
Combine small grain	120	8.56	6.43
Haul grain (on farm)	300	0.02 /bu.	0.02 /bu.
Grain cart	300	2.37	2.06
Corn picker	170	15.09	10.95
Silage harvester	200	27.47	17.94
Haul silage	140	1.01 /ton	0.69 /ton
Rotary mower	120	2.74	2.29
Mower-conditioner	120	3.31	2.13
Rake	120	2.03	1.62
Small square baler	120	5.97 /cutting	4.16 /cutting
Round baler	120	5.17	4.69
Stacker	120	7.11	6.22
Large square baler	120	7.07	6.70
Windrower	200	2.97	1.30
Haul hay & straw	120	1.12 /ton	1.01 /ton
Forage chopper	200	12.43	9.51
Forage blower	100	\$0.76	\$0.57
