Grading: There will be 5 assignments, a term paper, two midterm exams and a final. They will count toward the grade as follows:

<table>
<thead>
<tr>
<th>Component</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assignments and Paper</td>
<td>40%</td>
</tr>
<tr>
<td>Midterms</td>
<td>30%</td>
</tr>
<tr>
<td>Final</td>
<td>30%</td>
</tr>
</tbody>
</table>

Course Overview and Policies:

This course will cover traditional topics in Industrial Organization, such as monopoly and oligopoly theory, price discrimination, product differentiation, research and development, network. This course is divided into two parts: the exercise of monopoly power and the strategic interaction when firms are in competition. We will first study in detail the monopolistic behavior before introducing the strategic behavior. In order to fully understand the strategic behavior, a good knowledge of game theoretic models is very important. We will also study the effects of information being asymmetrically distributed among economic agents.

There will be two midterm exams and one final. There will be no make-up exams. If students miss the midterm exam and have a well-documented, university-approved excuse (such as a severe illness), the grade weights for the final exam will be scaled up appropriately. All students must take the final exam to be assigned a grade.

The homework assignments will be due the week after. They will not be accepted late for any reason. Every homework assignment will be included in the final grade calculation as well as the term paper. This required paper can be a model that you develop or a survey of papers in IO literature. I will distribute guidelines and a list of suggested topics. You may pick your own topic, subject to approval. I require an intermediate Paper Memo at the end of the 7th week of term, which should include a clear statement of the economic issues you will discuss, and any other legal or policy issues, and a comprehensive bibliography. The final paper is due at the end of the 16th week of term.

Iowa State University complies with the American with Disabilities Act and Section 504 of the Rehabilitation Act. Any student who may require an accommodation under such provisions should contact me as soon as possible and no later than the end of the first week of class or as soon as you become aware. No retroactive accommodations will be provided in this class.
