

Severe Storm Spotter Training

March 28, 2007, from 1:30 - 3:30 PM

Oak Room, Memorial Union

Spotter Training Highlights

- 2006 Iowa severe weather recap
- National Weather Service information sources
- The warning process
- What should a storm spotter report?
- The elements of a good spotter report
- Thunderstorm basics
 - estimating wind speed
 - categorizing hail sizes
- Thunderstorm elements including:
 - wall clouds vs. shelf clouds
 - funnel clouds vs. tail clouds
 - tornadoes
- Storm Spotter Safety

Environmental Health & Safety is proud to host severe storm spotter training presented by the National Weather Service, Des Moines. The training is especially encouraged for departments that have people working outdoors, but is open to all ISU faculty, staff and students. Whether you work or play on a sports field, golf course, farm or yard, this class could be life saving.

For more information or to register, call 294-2193 or email ksgodfr@iastate.edu.
